EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick Buchner on 4/15/08.

The application has been amended as follows:

Claim 1, line 13, delete "valve" and replace with ---volute---

Claim 21, lines 3-4, delete ", each of the volute chambers being an air passageway formed by two neighboring guide blades"

Cancel claims 2-3, 25 and 27-73

Claims 5, 7, 9, 11, 14 and 21-22 are rejoined.

The following is an examiner's statement of reasons for allowance:

Claim 1 includes the limitation that the bottom surface of outer peripheral end portions of volute chambers are located between lower and upper edges of the exhaust openings, each of the volute chambers being an air passageway formed by two neighboring guide blades, and the air stream released from the impeller passes through the volute chambers to be exhausted from an outer periphery of the air guide. The closest prior art of Tarutani ('258) teaches guide ribs (72) which act to guide the airflow towards an inside of the blower (figure 6) instead of outward as claimed. Further, the bottom surfaces of the outer peripheral end portions of guide ribs (72) are

not located between the upper and lower edges of the exhaust openings. They are instead located below the lower edge of the opening. If the ribs (71) were considered the guide ribs, they would still not meet the claim limitations because the bottom surfaces of the outer peripheral end portions are not located between the lower and upper edges of the exhaust openings. They are instead located above an upper edge of the exhaust opening (65a) (figure 6). It would not have been obvious to one of ordinary skill in the art at the time the invention was made to modify the reference to meet these claim limitations since there is no teaching or motivation to do so. Therefore, for these reasons listed above, the application is free from the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shay L. Karls whose telephone number is 571-272-1268. The examiner can normally be reached on 7:00-4:30 M-Th, alternating F.
